A MESSAGE FROM PUBLIC WORKS

Winter, and the snow and ice it brings to cover the roads, sidewalks and parking lots can be quite dangerous. Falls due to ice and snow are one of the most common injury causing incidents. Take steps now to prevent a fall by learning and implementing these suggestions:

Be Safe

- Plan extra time on your schedule to prevent being in a rush. Most accidents occur due to inattention or being in a hurry.
- Remove snow from shoes before entering any building.
- Always use a handrail when climbing up and down stairs.
- Always use handrail when going in and out of buildings, vehicles or public transportation.

Wear footwear with traction, consider Yax Trax or something similar.

Be Smart

- Walk at a slower pace.
- Stay on designated walkways.

Watch for and avoid slippery surfaces.

Be Seen

- Wear visible clothing especially at night or during heavy snow.
- Wait for vehicles to stop completely before crossing the road.
- Approaching vehicles may not be able to stop immediately due to road conditions.
- If you fall, relax and try to fall as limply as possible. Avoid using your arms to stop your fall.

If you need immediate medical attention, call 911.
